RE: Final Submission under HPV Challenge Program for Isooctadecanoic Acid Reaction
Products with TEPA (CAS # 68784-17-8)

Dear Dr. Sheridan and EPA Staff:

I am writing on behalf of the Health and Environmental Regulatory Task Group of the Petroleum Additives Panel of the American Chemistry Council (ACC).

Attached please find the Task Group's final submission for the substance known as Isooctadecanoic Acid Reaction Products with TEPA (CAS # 68784-17-8). This substance may have been informally referred to in previous communications with EPA as Group 9. This submission contains no CBI. The submission consists of three parts (see three attachments): a cover letter dated January 30, 2008, a final data report, and a final set of robust summaries.

With this submission, the Task Group believes it has satisfied its commitment for this substance under the EPA HPV Chemical Challenge Program. If you have any questions regarding this submission, please contact me by telephone (703-741-5633) or by email (jon_busch@americanchemistry.com).

Over the past year, I have replaced Dr. Susan Lewis as the ACC manager responsible for this particular chemical.

Kind Regards,

Jonathon T. Busch
Manager, Health and Environmental Regulatory Task Group
Director, Chemical Products and Technology Division
